

Filtrex[®] Products

The industry leader in sustainable erosion & sediment control and low impact development applications

Filtrex Advantages

- **Sustainability.** Lower your carbon footprint with the most effective BMPs that Mimic Nature[®] by using annually renewable, locally recycled, organic materials.^{1,2}
- **Compliance.** Nationwide compliance sets you on a clear path to reach your goals.
- **Performance.** Proven to outperform conventional, unsustainable products.¹
- **Value.** Complete projects on time and within budget with Filtrex products.^{3,4}
- **Research.** Third-party tested products bring the results you want to your project.¹

Filtrex Environmental Sustainability Benefits

Filtrex SiltSoxx™ uses **locally recycled organic materials** inside of photodegradable or biodegradable mesh. Diverting these organic materials from landfills and applying them to the soil means a reduction in greenhouse gas emissions. **For every 1,000' of 8" SiltSoxx used, 33,000 lbs of organic materials are diverted and your carbon footprint is reduced by 70,000 lbs CO₂e.** This is the equivalent of offsetting the greenhouse gas emissions of **7 passenger vehicles** driven for one year.² SiltSoxx minimizes the cost of removal/disposal and keeps excessive amounts of plastic out of the landfill—at the end of your project, simply spread the organic materials on-site.⁵

Erosion & Sediment Control

Product: SiltSoxx™

Applications:

- Perimeter Control
- Inlet Protection
- Check Dams
- Concrete Washout
- Slope Interruption
- Runoff Diversion*
- Sediment Trap

Targeted Pollutant Removal

Products: EnviroSoxx® and StormExx®

Applications:

- Inlets
- Biofiltration
- Catch Basin Filters
- Contaminated area wraps

Targeted Pollutants:

- Heavy Metals
- Hydrocarbons
- Bacteria
- Nutrients

Stormwater Management

Product: GroSoxx®

Applications:

- Filtration System
- Channel Protection
- Bank Stabilization
- Rain Garden/Bioretention System
- Bioswale
- Gabions

Structural LivingWalls

Products: GroSoxx® and GardenSoxx®

Systems:

- EarthBloxx® Concrete Block
- EnviroBloxx® Polymer Block
- Trinity® Wire Wall
- GreenLoxx® MSE Wall
- GreenLoxx® Non-MSE Wall

Vertical LivingWalls

Products: GroSoxx® and GardenSoxx®

Systems:

- VerTexx® LivingWall
- VerTexx® LivingScreen
- Green Roofs

Living Shorelines

Product: GroSoxx®

Applications:

- Edge Protection (pond, river, creek, stream)
- Stream Restoration
- Revetment
- Dune Regeneration & Scarp Protection

System: GreenLoxx® Non-MSE Wall

SiltSoxx™ are in compliance with most state & federal agencies including:
